

# Dobot Magician

SHAKE HANDS WITH THE FUTURE

# Develop, and be ahead

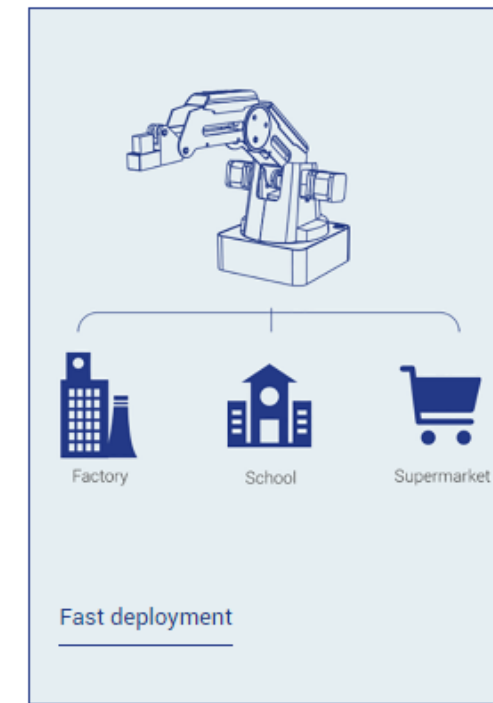

Endless potential, fast deployment. Be ahead of the game.

Rich extension ports

Visual programming

Fast deployment

## Future lifestyle

One robot, many extensions, a highly cost effective solution  
Enhanced human-machine cooperation, bringing efficiency to daily life  
Technology influencing education in most entertaining ways  
Living rooms, classrooms, workshops, factories...the future life is right ahead

the future life right ahead

## Most user-friendly robotic arm

Thoughtful details integrated in simple design

**Multiple controlling methods, enjoy anytime**  
PC, phone, gesture, voice, even brainwave can be used to control Dobot Magician.

**DobotStudio, one big step of interaction**  
Dobot Magician's controlling software DobotStudio has integrated so many features, while making it easier to control a robotic arm. DobotStudio also has a whole set of parameters for you to customize. You can control your own robotic arm without any coding!

**End tool quick switch, it's never been so smooth**  
With the standardized plug-in style end tool holder, you can switch end tools by simply screwing.

**Handhold teaching, repeat your tasks with just a click**  
The handhold teaching feature lets you control a robotic arm without any limits. The most intuitive interaction bringing the best of your efficiency.

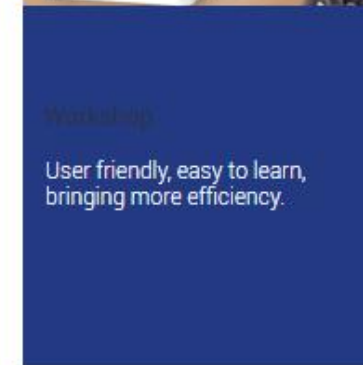

### Classroom

Mechanics, Electronics, Programming, Design... Knowledge empowers your life!

Smart, fun and reliable!

User friendly, easy to learn, bringing more efficiency.

### Factory

Fast to equip, easy to maintain, a high cost effective solution for production line.

Applications ● 3D Printing ● Laser Engraving ● Pick & Place ● Screen Testing ● Drawing ● Educational training & more
